THE MANUFACTURER RESERVES THE RIGHT TO MAKE ANY CHANGES IT DEEMS NECESSARY TO IMPROVE ITS MODELS OR TO MEET ANY REQUIREMENTS OF MANUFACTURING OR COMMERCIAL NATURE.

THE SECRET OF THE QUALITY OF CZ WEAPONS

WHAT IS THE REASON FOR THE CONTINUOUS AND EVER GROWING GLOBAL SUCCESS OF CZ WEAPONS? TO LIST ALL THE ADVANTAGES OF THESE PRODUCTS WOULD TAKE A LONG TIME AND WOULD PROBABLY DIFFER SLIGHTLY FROM ONE CUSTOMER TO ANOTHER. HOWEVER, ALL USERS DO AGREE ON ONE THING: WEAPONS FROM ČESKÁ ZBROJOVKA A.S. EXCEL IN THE QUALITY OF PRODUCTION.

Although the arms industry belongs to the most demanding engineering fields, it is not hard to achieve top results when you have a lot of finances. The real skill is achieving high level of quality in high volume production resulting in top-class weapons affordable for the general shooting public.

Only a small number of global companies have mastered this art. CZ has embraced this approach right at their beginnings,

dating back to 1936. Since then it has continuously kept it and developed it further. In Uherský Brod, where the company's main production site has been based for more than 80 years, they do not rely only on tradition. On the contrary,

100% INCREASE IN PRODUCTION

In the past decade, CZ has doubled its production capacity and at the same time greatly improved the already renowned quality of its products. It is the result of a thoughtful modernization strategy involving several interrelated items.

Over these years, CZ has brought a new generation of weapons to the market in all the key sectors, from pistols and rimfire rifles to machine guns and assault rifles. With all these new models the company has used the latest development practices in order to simplify and accelerate the production processes while maximizing the durability and lifetime of all major as well as smaller parts. And hand in hand with this goes the introduction of completely new technologies, all while minimizing production costs to maintain agreeable retail prices. Since for CZ, the customer always comes first.

NUMBERS SAVE MONEY

While in the army sweat saves blood, in modern arms production calculations and modelling saves money. At the birth of each CZ weapon it is now commonplace to involve various stress engineers and specialists in different manufacturing processes and materials. Thus at the very first stage of development, all potential problems are effectively eliminated, whether in the manufacturing itself or in practical use.

A special chapter is the improvement of the ergonomics of CZ weapons. Perfect grip and extremely convenient operation are the trademarks of all CZ weapons. Nowadays, to achieve the desired result, the popular 3D modelling is used, but now a unique DiFEND methodology (Digital Firearm Ergonomic Design) using a biomechanically accurate human model is also applied to achieve the best possible ergonomics for the intended target market. This pioneering process has been applied for the first time with great success in the design of the new CZ P-10 pistol.

TIRELESS ROBOTS

Over the last decade, CZ has moved from the era of traditional CNC machine tools to fully automatic turning-milling centres and then, most recently to robotic systems. Currently, they are successfully used mainly in the production of the major parts for CZ weapons. Moreover, robotic systems are increasingly applied in other operations, including the crucial

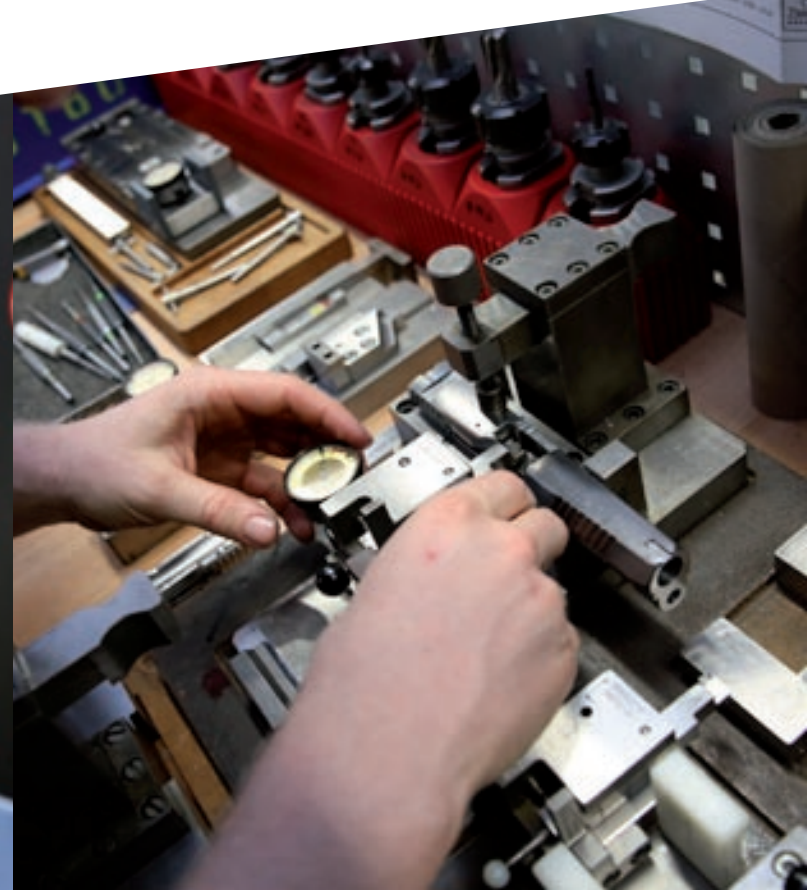

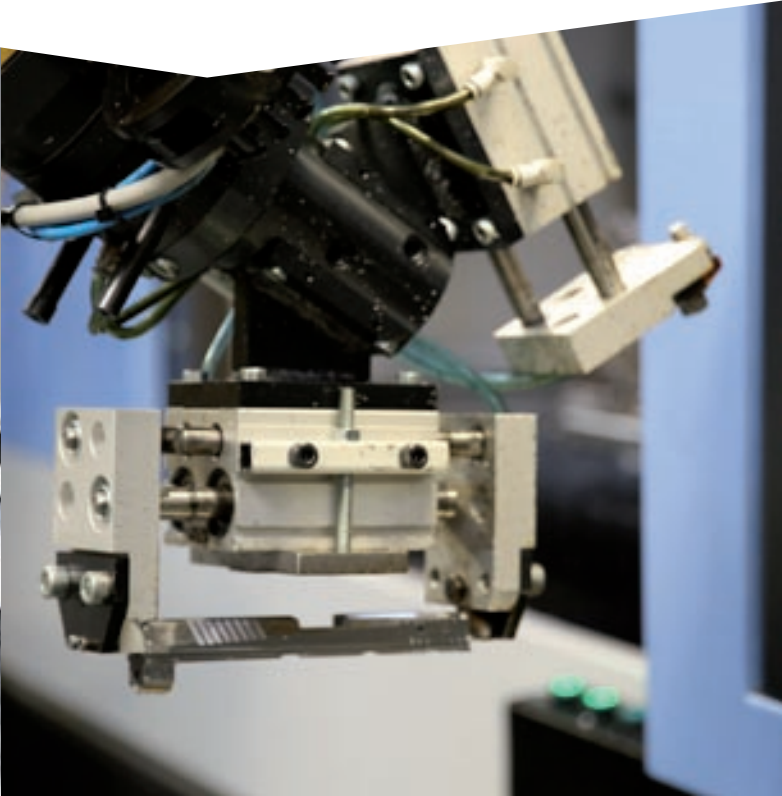

manufacture of hammer forged barrels. Thanks to large investments in highly advanced technologies and a new generation of machines that are capable of continuous operation with minimal intervention of the human hand, CZ has not only managed to dramatically increase its capacity but also achieve a remarkable enhancement in precision during production. Extensive checks during all the production stages are carried out with sophisticated laser equipment when several hundred parameters are monitored for each part. Overall, this approach ensures that the weapons which the customers receive from CZ are always of the highest quality.

KNOW-HOW

The secret of the quality of CZ weapons lies in one more factor. Even the best robot – at least in the present and near future – cannot work well if it is not prepared for production by an experienced and knowledgeable expert.

The greatest value and the main key to the success of CZ therefore continues to lie in its employees, from the designers and product managers to programmers and production workers. They all do their very best every day with one goal: so that people all over the world receive weapons to which they can confidently entrust their lives and the lives of their closest, weapons that will never fail them on a hunt or at a shooting range and weapons that will very likely survive their users for many years. Weapons from CZ.

PISTOLS

**THE YEAR 2017 BRINGS MORE GREAT NEWS FOR THE FANS OF CZ WEAPONS
– AND FIRST RATE MODERN SHORT FIREARMS.**

**ČESKÁ ZBROJOVKA A.S. IS NOW LAUNCHING THE CZ P-10 MODEL, A PISTOL THAT WILL
CHANGE YOUR OPINION ON THE CATEGORY OF STRIKER FIRED PISTOLS.**

Česká zbrojovka a.s. was founded in 1936 with the intention to produce the best aircraft machine guns of that time. The extensive knowledge and experience in this field were applied by the company to many other related products for both the service and civilian markets. Defence, service and sport pistols have had their place in the portfolio since 1957. The most famous and unrivalled is the legendary top-selling CZ 75, a truly ground-breaking model regarding its design, which entered serial production 40 years ago.

In all its forms the CZ 75 has become a phenomenon in its class and in its current design it still represents the flagship of the CZ pistols portfolio. The absolute top of the all-steel series is currently the CZ SHADOW 2, the key new model of last year, which has become popular particularly amongst IPSC shooters.

Nevertheless, the service and defence polymer models, the CZ P-07 and CZ P-09 that use the modernized SA/DA Omega mechanism have also seen great success.

With the new CZ P-10 model Česká zbrojovka a.s. is setting out in a completely new field – the increasingly popular division of defence and service striker fired pistols with polymer frames. The result is a highly advanced model bringing major improvements in key areas, such as ergonomics, durability and reliability. In addition, it comes as a part of a whole family. After the introduction of the Compact in 2017, a Standard and Sub-compact models will follow.

CZ P-10 A STRIKER FIRED PISTOL AT A NEW LEVEL

FOR DECADES, THE CZ BRAND HAS BEEN SYNONYMOUS WITH HIGH QUALITY YET AFFORDABLE SELF-LOADING PISTOLS WITH AN EXTERNAL HAMMER. THE CZ 75 FAMILY IS A LIVING LEGEND AND THE CZ P-07 AND CZ P-09 MODELS EMBODY A SUPERB CHOICE FOR FANS OF POLYMER FRAMES. NOW, CZ HAS DECIDED TO ANSWER THE PLEAS OF THEIR NUMEROUS SUPPORTERS AND OFFER THEM A CUTTING EDGE PISTOL IN THE INCREASINGLY MORE POPULAR CONFIGURATION – A STRIKER FIRED MODEL. THE RESULT IS AN ENTIRELY NEW LINE, THE CZ P-10.

Perhaps the greatest reason for the current popularity of striker fired pistols is their simple operation and (in the predominant systems with a partially pre-cocked striker) a constant trigger travel and pull weight. It might not be the perfect weapon for all users and all situations but overall, it represents the ideal compromise for many shooters, especially for members of the armed forces. The demand for striker fired pistols is so high that this trend has been picked up by more and more manufacturers, including those focusing on the traditional hammer. However, only a few of them show any inventiveness. Admittedly, it is difficult to do so because it is beginning to look like all claims in this lucrative gold field have been staked and there could be no more variations of tried and tested solutions. What is more, one cannot be entirely sure if customers really do want something completely new. Yet, the CZ P-10 from Česká zbrojovka shows that when you know which crucial trump cards to change in a clearly defined deck, the game takes on a different meaning.

LET THE BEST WIN!

CZ is well aware of this statement, as for several years, its development has been in the hands of the product managers who play a key role. Together, they present an impressive array of practical experience: former members of the armed forces, sport shooters, active hunters... In short, people who are able to define precisely what the end users need and what they will appreciate. That is why the new generation of CZ pistols with external hammers is so successful. In particular, the CZ SHADOW 2, CZ P-07 and CZ P-09 represent the absolute top in their respective categories. Naturally, the same procedure has been applied to the new series of the striker fired pistols.

This project was mentioned in CZ for the first time around 2009, but it really took off only after the successful completion of the CZ P-07 and CZ P-09 polymer models with hammers. The development followed several independent lines based on an internal competition within the factory, from which a solution that proved to be better and more promising progressed to the final stage of the development. The resulting CZ P-10 pistols represent a modern version of its kind, pleasing the eye of the shooter with their sleek design and at the same time aggressive shape – unlike many rival models, the CZ P-10 is so original that you will recognize it at first sight. Regarding the construction, you will find everything you require from a modern striker fired pistol. The CZ P-10's modified Browning system slide locks into an enlarged ejection port, it has a partially pre-cocked linear striker, it is very safe despite the absence of a manual safety, it has a durable polymer body with interchangeable backstraps, high capacity magazine... Feel free to carry on listing more and more features, the P-10 will not disappoint. But that is not all. We are talking about CZ brand pistols and with these we have got used to not only the quality and favourable price but also to creativity and added value.

A NICE 20 N

It is obvious on the trigger and striking mechanisms with the partially pre-cocked striker. CZ has managed to deal with this same old thing in such a way that looking inside the weapon, it not only looks unfamiliar, but what is most important – the trigger pull weight is a standard 20 N. For pistols of a primarily defence and service nature, it is a nice and still completely safe value our rivals can only dream of. The 4 mm beautifully clear reset is also excellent, shooters with sufficient

experience can thus repeat shots rapidly. An automatic striker guaranteeing drop safety is a must. Furthermore, we also have here the obligatory safety in the trigger blade. Together with the trigger and striking mechanism, the CZ P-10 is an extremely safe weapon whereby successive disabling of security features comes easy with correct handling. The CZ P-10 is characterized by having the slide guides on the outside. This solution has not been used much in CZ pistols so far. Because of this, the width of the frame is reduced and there are two pairs of cocking grooves on the distinctive protruding sides of the slide. Nothing was spared on their design. The upper edges of the slide at the front are slanted for easier drawing and holstering, a "trademark" of CZ polymer frame pistols ever since the appearance of the CZ P-07 DUTY model.

DIGITAL FIREARM ERGONOMIC DESIGN

CZ really did take their time on the frame itself. After extensive experience with hammer polymer models, for the CZ P-10 a new production material reinforced with glass fibre was being considered with the help of the latest computational procedures. Subsequently, in close cooperation with specialists in plastic materials, the design of the frame and the mould were adapted to the new material's properties. At the same time, the crucial issue of ergonomics was also addressed. This is an area in which CZ pistols usually outperform their rivals and the new striker fired models are no exception. On the contrary. The CZ P-10 frame is the result of the practical application of the latest scientific methods in industrial design. Actually, CZ has established cooperation with a specialized university facility, resulting in a unique

methodology called DiFEND (Digital Firearm Ergonomic Design). With this method, a biomechanically accurate human model is used which enables designing the best ergonomics for the anticipated target market. In the case of the P-10, this method was combined with an analysis of the ideal checkering, a crucial item especially during prolonged shooting or shooting with sweaty hands.

The grip of the CZ P-10 looks simple but as soon as you grip it, you will know that something has changed for the better. You will feel it even more so after firing off the first few rounds and especially when you empty several magazines. The pistol will stay in the ideal position at all times, it will not move about even in a very sweaty hand, targeting is natural, the muzzle climb is minimal and all hits will be in alignment. Really impressive! The size of the grip can be partly altered with the easily interchangeable backstraps which come in an S, M and L size, and the comfort of the grip in the compact design is significantly transformed by using an extended magazine baseplate. The characteristic shape of the CZ P-10 is further enhanced by a large trigger guard with a roughened front edge, above which there are the tried and tested roughened surfaces on the sides of the frame for the safe "resting" of the index finger of the shooting hand and for a firmer grip with the thumb of the other hand. On the front of the frame, there is the standardized mounting

rail with one transversal groove in the compact design models.

BONUSES THAT COUNT

The CZ P-10 pistols are one of the few on the market that offer a fully ambidextrous control of the slide stop and the magazine catch. Finding a reliable, durable and simple to produce solution of ambidextrous controls is not nearly as straightforward as many shooters may think. Nevertheless, CZ has dealt with this task perfectly. Together with the ambidextrous magazine catch, CZ polymer pistols will now also have universal magazines with an additional opening in the front of the case. Apart from the striker fired P-10, they can also be used for the CZ P-07 and CZ P-09 hammer models. As part of the changes, the new magazines have a distinctive red follower which is clearly visible through the ejection port when the slide is caught in the rear position and is easily spotted for example when dropped on the ground. The big advantage of the new CZ P-10 series is its superior durability, the life time of barrels is at least 50,000 rounds and of smaller parts it is 30,000 rounds. A significant contribution to this is also the highly durable finish. Another step forward in the P-10 is the use of stainless steel for all other internal metal parts. Thus the weapon is completely resistant to corrosion. Users will also undoubtedly appreciate the excellent sights, used together with the newly unified dovetail of the SHADOW models. Therefore, due to the wide range of options, there are numerous interesting possibilities for individual configurations.

The CZ P-10 has an original rear sight with an added edge for one-handed cocking, for example, against a belt. The rear sight is made from high quality aluminium alloy (therefore it is also anticorrosive) and is anodized in black. Both the rear sight and the front sight are accentuated with three luminescent dots. Other variants of sights will be available as an optional accessory for which CZ has big plans. For example, there is already a magazine catch with a wider grip (the basic version has a flat grip) and good quality service as well as civilian holsters are also available, specially developed for the CZ P-10.

THE COMPACT WITH AN IMPRESSIVE CAPACITY

The CZ P-10 was created as a comprehensive model series ranging from a full size pistol to a subcompact. However, the first to enter the market is the "middle" version - the compact. The name is kind of confusing because the CZ P-10 C is in fact a full service and defence striker fired pistol in 9 mm Luger (9x19) or .40 S&W cal. with an impressive firepower capacity. For the 9mm there are 15+1 cartridges, or 17+1 with a baseplate; in the .40 it is 12+1, or 15+1 cartridges respectively. We will have to wait a while for some other members of the CZ P-10 family. Even so, the existing model represents great news not just for fans of the CZ brand. The tagline Improving on Perfection that CZ have chosen for this series is not overstated. These are striker fired pistols that have all the makings to shoot more accurately, faster, yet with more comfort than ever before.

CZ P-10 C NEW

SHOOT WITH CONFIDENCE

CZ P-10 C IS THE NEWCOMER IN THE "STRIKER FIRED" PISTOLS DIVISION FOR PERSONAL DEFENCE AND ARMED FORCES. IT IS COMPACT, THEREFORE ALSO SUITABLE FOR CONCEALED CARRY.

9x19 15 (17) .40 S&W 12 (15)

NEW "DEGREE" OF RESISTANCE AGAINST CORROSION AND MECHANICAL DAMAGE

EXCEPTIONAL IRON SIGHTS ACCENTUATED BY THREE LUMINESCENT DOTS

AUTOMATIC STRIKER BLOCK GUARANTEEING DROP SAFETY

SLIDE AND BARREL WITH EXTREMELY DURABLE SURFACE FINISH

MECHANICALLY AND THERMALLY STABLE POLYMER FRAME REINFORCED WITH GLASS FIBRE

THREE INTERCHANGEABLE BACKSTRAPS IN S, M, L SIZE

THE TRIGGER TRAVEL IS SMOOTH, THE TRIGGER PULL WEIGHT IS 22 N AND TRIGGER RESET IS 4 MM

TWO PAIRS OF COCKING GROOVES FOR COMFORTABLE HANDLING

FLAT AMBIDEXTROUS SLIDE STOP AND MAGAZINE CATCH; A SLIDE STOP WITH A WIDER GRIP FOR RIGHT-HANDED AS WELL AS LEFT-HANDED SHOOTERS IS AVAILABLE AS AN ACCESSORY

EXCELLENT SHOOTING COMFORT THANKS TO THE WELL-DESIGNED ERGONOMIC GRIP WITH DISTINCT CHECKERING

EXCELLENT MAGAZINE CAPACITY OF 15 (17) ROUNDS IN 9X19 CALIBRE

CZ P-10 C

9x19 15 (17) .40 S&W 12 (15)

CZ P-10 C FDE

A version in Flat Dark Earth with tritium sights.

9x19 15 (17) .40 S&W 12 (15)

The CZ P-10 is another "level" of a defence and service pistol, excelling in reliability, durability and refined shooting, greatly supported by the unique checkering and superb grip which were designed using the new DiFEND methodology for ergonomics. Included are also magazine baseplates which increase the capacity from 15 to 17 cartridges in the 9x19 calibre, and three interchangeable backstraps for individual adjustment of size.

CZ P-07

A COMPACT PISTOL WITH A HIGHLY DURABLE POLYMER FRAME, DESIGNED PRIMARILY FOR ARMED FORCES AND FOR CONCEALED CARRY, PROVIDES RELIABLE AND ACCURATE SHOOTING EVEN IN EXTREME WEATHER CONDITIONS.

9x19 15 (17) 9x21 15 (17) .40 S&W 12 (15)

EXTREMELY DURABLE FINISH ON SLIDE, BARREL AND OTHER MAJOR PARTS

EXTREMELY EASY TO USE STEEL SIGHTS WITH THREE LUMINESCENT DOTS

EASY TO CHANGE MANUAL SAFETY AND DECOCKING CONTROLS

THREE INTERCHANGEABLE BACKSTRAPS IN S, M, L SIZE

TWO PAIRS OF COCKING GROOVES FOR COMFORTABLE HANDLING

MECHANICALLY AND THERMALLY STABLE POLYMER FRAME REINFORCED WITH GLASS FIBRE

IMPROVED ERGONOMICS OF THE TRIGGER

EXCEPTIONAL FIRING CAPACITY OF 15 (17) CARTRIDGES IN 9X19 CALIBRE

The CZ P-07 is a compact version of the standard CZ P-09 model, retaining the major advantages of this bigger service weapon. What is more, due to its smaller dimensions and lighter weight, it is suitable for all day concealed carry. Drawing is fast and smooth thanks to the absence of sharp edges on exposed areas. Included are additional magazine baseplates which increase the capacity from 15 to 17 cartridges in 9x19 calibre, three interchangeable backstraps and interchangeable manual safety/decocking controls. The pistol can therefore be fully customized to the users' needs.

**BEST
IN CLASS**

CZ P-07 KADET

A new pistol in .22 LR calibre, with a forged barrel and attractive frame in URBAN GREY.

.22 LR 10

CZ 75 B Ω

OMEGA IS PERFECTION

A NEW GENERATION OF THE TIMELESS CZ 75 B MODEL, EQUIPPED WITH A SIMPLIFIED OMEGA TRIGGER MECHANISM WITH AMBIDEXTROUS MANUAL SAFETY/DECOCKING CONTROLS THAT ARE EASY TO CHANGE. THE TRIGGER, HAMMER AND SIGHTS WITH DISTINCTIVE LUMINESCENT DOTS HAVE A NEW SHAPE. THE TRIGGER PULL WEIGHT IS AROUND 16 N.

9x19 16

NEW LUMINESCENT SIGHTS

THE NEW DESIGN OF THE HAMMER ENABLES SAFER AND FASTER HANDLING

THE NEW TRIGGER MECHANISM ALLOWS EASY CONVERSION OF THE MANUAL SAFETY TO DECOCKING AND VICE VERSA

DUE TO THE AMBIDEXTROUS CONTROLS (MANUAL SAFETY, DECOCKING, REVERSIBLE MAGAZINE CATCH) THE WEAPON IS ALSO SUITABLE FOR LEFT-HANDED SHOOTERS

ERGONOMIC RUBBER GRIP PANELS FOR MORE SECURE GRIP

NEW SHAPE OF THE TRIGGER FOR EASIER REACH IN THE DA MODE

THE MAGAZINE CATCH CAN BE EASILY ADAPTED FOR LEFT-HANDED SHOOTERS

The CZ 75 B Ω steel sights are accentuated by three luminescent dots. The sight line is longer due to the extended rear sight. The modern shape of the hammer has been unified with the CZ P-07 and CZ P-09 models. The straighter trigger enables easier reach of the finger in the DA mode. The gripping surfaces of the ambidextrous manual safety/decocking controls ensure reliable handling even with a dirty hand. The grooved bar on the top of the slide prevents disruptive reflection of light when aiming. The magazine catch is mounted on the left side of the frame, however, it can be easily moved to the right side. The excellent ergonomics of the weapon in combination with the Omega mechanism properties enable fast and accurate shooting in both the SA and the DA modes.

CZ 75 B STAINLESS

CZ 75 B STAINLESS is a stainless steel version of the legendary CZ 75 B model.

9x19 16

CZ 75 B NEW EDITION

The CZ 75 B NEW EDITION is the high-end stainless steel variant of the legendary CZ 75 B model, its surface is sand blasted and the sides of the slide and frame have decorative engravings. In the USA, this pistol is sold under the name LIMITED EDITION.

9x19 16

AMBIDEXTROUS INTERCHANGEABLE CONTROLS

CZ 2075 RAMI

The CZ 2075 RAMI subcompact offers all the main advantages of the CZ 75 pistols – high performance, high accuracy and excellent ergonomics in combination with exceptionally small dimensions.

9x19 10 (14) .40 S&W 8 (10)

CZ 2075 D RAMI

The CZ 2075 D RAMI model is equipped with a left-hand decocking control, making it suitable for security forces.

9x19 10 (14)

The CZ 75 P-01 Ω combines the great properties of the successful CZ 75 D COMPACT model with the benefits of the simplified Omega trigger mechanism. There are several innovations – the steel three dot sights with the rear sight extended backwards, a straighter trigger for easier reach of the finger in the DA mode and the new design of the hammer, unified with the CZ P-07 and CZ P-09 polymer models. The frame is made of highly durable aluminium alloy, therefore offering the benefits of a traditional material while keeping the overall weight of the weapon low. The result is a highly durable and accurate weapon suitable for all day carry, concealed as well as open. A model in 9x21 calibre is also available for countries where the 9x19 calibre is not permitted to be used by ordinary citizens.

"ORANGE" ALUMINIUM MAGAZINE BASEPLATES TO MATCH THE GRIP PANELS AND THE MAGAZINE WELL

This cutting-edge sports special embodies the current top of the CZ pistols for the IPSC standard division. The design is based on the successful CZ 75 TS model and by improving precisely targeted areas, a stunning and highly effective tool for achieving perfect results has been created. Through a unique combination of traditional and cutting edge technologies, the CZ 75 TS ORANGE pistol excels in superb accuracy, excellent durability and absolute reliability. The newly designed checkering on the front and rear wall of the grip ensures reliable grip at all times. The trademark of this weapon are its unique flat orange grip panels made of aluminium and the buttplate of the same colour for the double stack magazine with an impressive capacity.

LOADED CHAMBER INDICATOR

PERFECT ERGONOMICS

BARREL BUSHING

SA/DA TRIGGER MECHANISM

DOUBLE STACK MAGAZINE WITH 10 CARTRIDGE CAPACITY

In the CZ 97 B model, the perfect ergonomics of the CZ 75 come together with the exceptional performance of the .45 ACP cartridge. The weapon excels in high magazine capacity, refined behaviour during shooting and high accuracy in both the SA and DA modes. A good balance is achieved by the steel frame extending towards the front wall of the slide. Here, the slide is equipped with barrel bushing to centre it. Drop safety is guaranteed by the automatic firing pin block safety. There is also a loaded chamber indicator. The pistol is supplied as standard with wooden grip panels with fine checkering providing reliable and comfortable grip. The slide is fitted with two pairs of cocking serrations for traditional as well as modern style of cocking.

CZ 97 B

.45 ACP 10

CZ 97 BD

.45 ACP 10

The CZ 97 BD model is based on the basic CZ 97 B model, from which it is distinguished mainly by having a lever for the safe release of a cocked hammer – decocking. There are also new rubber grip panels improving grip in adverse weather conditions. This pistol has been developed primarily for the armed forces in countries that prefer the .45 ACP calibre.

SA - single action, DA - double action, RDS - collimator

Specified dimensions may vary according to design and configuration

Locking lug - a notch on the hammer, which prevents unintentional discharge in situations when the hammer slips during manual cocking**Firing pin block** - stops the firing pin from moving when trigger is not pulled, minimizes the risk of unintentional discharge when handling the weapon improperly, especially when a loaded weapon is dropped**Decocking** - moves the hammer from its cocked position onto a safety lug without the need to pull trigger, after hammer is released, the weapon is safe for ordinary handling while being ready for immediate use**Manual safety** - for applying safety by the user**Magazine safety** - blocks the trigger mechanism when magazine is not attached**Trigger safety** - prevents spontaneous and uncontrolled backward movement of the trigger (drop safety).**Trigger bar safety** - the trigger bar catching the pre-cocked striker (CZ P-10) cannot be lowered and thus release the striker without pulling the trigger first.**Loaded chamber indicator** - shows whether a cartridge is present in the chamber.

A person wearing a brown hat and a green jacket is aiming a rifle with a large scope in a forest. The rifle has a wooden stock and a black barrel. The background is a blurred green forest.

RIFLES

**TRADITION AND ORIGINALITY. TOP QUALITY AND AFFORDABILITY.
A WIDE RANGE OF PRODUCTS WITH CONSTANT ADDITIONS. THESE ARE JUST SOME
OF THE ADVANTAGES OF LONG ARMS FROM ČESKÁ ZBROJOVKA A.S.**

Whether you are looking for a long firearm for hunting or for sport shooting, training or just to enjoy, you will definitely be able to choose from the wide range at Česká zbrojovka a.s. These products form one of the traditional pillars of success for the company that takes maximum care in its production and continuously delivers new innovations and new models. The current portfolio of Česká zbrojovka a.s. therefore also includes the extraordinarily popular, reliable and highly accurate repeating rifles in the lite, medium and magnum categories, as well as a wide range of shotguns, rifle shotguns and rifles of Zbrojovka Brno and CZ-USA brands. All CZ rifles boast a hammer forged floating barrel, receiver made of a single piece of high quality steel and attractive, sophisticated ergonomic stocks made from traditional as well as modern materials. To put it simply, Česká zbrojovka a.s. keeps in mind all customer needs from the hunting and sporting communities.

The new flagship of the medium rifle sector is the CZ 557 series with unrivalled user parameters. The rifles that recently caused the most stir were the CZ 557 VARMINT and the CZ 557 RANGE RIFLE. The stalwart in the lite section is the CZ 527 series using the traditional "minimauser" system that now also includes the THUMBHOLE model and the EXCLUSIVE MAPLE LIMITED EDITION series.

The main newcomers for 2017 are two exclusive models in the traditional magnum .300 H&H, .404 Jeffer, .375 H&H, .458 Lot and .416 Rigby calibres, marketed under the brand name SAFARI CLASSICS. These weapons are intended for those who appreciate the high quality hand-crafted workmanship, hi-tech anti-corrosion surface treatment, premium quality Turkish walnut stock, a kickstop installed in the body of the stock to reduce the recoil and the unique design combining the longtime experience of the CZ brand and individual approach to these exceptional models.

CZ 550 SAFARI CLASSICS II.

AFRICA. THOUGH FREQUENTLY CALLED THE DARK CONTINENT, IN REALITY IT IS UNBELIEVABLY COLOURFUL AND FULL OF CONTRASTS. THE TRAVELLER IS CAUGHT BY SURPRISE WITH THE FASCINATING BLUE OF THE DAWN, THE BLINDING NOON SUN AND CLOUDS AS WELL AS THE LUSTRE BLACK OF THE NIGHT AND STARS AS IF THEY WERE FLUID SILVER.

It is the home to an incredible number of species. The true heart of the hunting Africa is in the south east of the continent, in Namibia, Uganda and South Africa. During the second half of the 19th century there were no substantial white spots on the map of Africa but as rule, it was a continent where life and hunting called for the presence of a real man. The first half of the 20th century is then referred to as the Golden Age of hunting. Names like Frederick Courteney Selous, Cecil Rhodes, Walter D. M. "Karamojo" Bell, Bill Judd, R. J. Cunninghame, Alan Black, Leslie Tarlton or Denys Finch Hatton have become legendary. Thanks to these famous white hunters, African safari gained in popularity. Safaris were popular amongst members of the aristocracy and royal dynasties (especially the English) as well as among heads of democratic states (like Theodore Roosevelt), writers (Ernest Hemingway) and other celebrities. The most famous gun used by the white hunter at that time was the double rifle, however, if you study their equipment really carefully, you will find that the most frequently used gun was a Mauser type repeating bolt action rifle. This was the everyday working weapon. In an overwhelming majority of cases it was a powerful African calibre with a bore at least .35" in diameter, but it was still a Mauser type weapon with an ultra-reliable controlled feed and an exceptionally durable bolt.

The popularity of Mauser type weapons in tropical calibres in Africa survived both World Wars and has continued till today. After 1970, the ZKK 602 rifles from Uherský Brod acquired a very good reputation. Many professional hunters and guides in Africa still use them today and it is often regarded as an almost perfect embodiment of a hunting mauser. The ZKK 602 production in Uherský Brod terminated around 1996, when CZ replaced them with the CZ 550 series. The African safari continues to be the dream of most hunters worthy of this name. However, nowadays it is very unlikely that someone would bag hundreds, or not even dozens, of animals of the Big Five – lions, elephants, cape buffalos, leopards and rhinos. Still, the African mauser has its place even today. A professional hunter can use it to protect a photographer or a cameraman. And, it can of course be used for hunting other game, not just the Big Five. In this respect, Africa offers many opportunities. Remember that today, in many corners of Africa hunting has become a true industry; an industry operated in perfect harmony with the principles of game preservation and environmental management. In fact, it is an example of a rare but true sustainable utilization of the environment. With such a rifle, you can hunt any game anywhere in the world. Contrary to widespread rumours, the large and heavy

bullet of the tropical calibre does not necessarily have a devastating effect. But the powerful stopping effect and terminal wound ballistics are truly impressive. The CZ 550 SAFARI CLASSICS II. is a respectable successor of the famous powerful Rigby rifles or the ZKK 602s. This is not a rifle that has just had a bit of a facelift and been given a new stock from some ordinary serial rifle. It is true that the SAFARI CLASSICS II. share the basis with bolt rifles produced serially – the forged blanks of the receiver and the bolt, plus the barrel is hammer forged too. However, regarding the CZ 550 SAFARI CLASSICS II. in 300 Holland&Holland Magnum and 404 Jeffery calibres, there is a difference. These blanks are broached and produced for CZ by the renowned German manufacture, Lothar Walther. An African mauser must be absolutely reliable, since the hunter's life depends on it. Therefore, the blanks are processed and assembled manually, one rifle after another, by skilled master gunsmiths. Each rifle is individually assembled so that the bolt's run is smooth and the handling of all controls is reliable, precise and silent. And that's just the beginning. Despite its beauty (or because of it), Africa can be very harsh on guns. Dust, sweat, salty wind and fluctuating temperatures – all of these relentlessly attack the gun as it is carried in the hand of a hunter walking across the savannah. The surface treatment has to be perfect. Current modern times offer a wide spectrum of surface treatments and for the new generation of the CZ 550 SAFARI CLASSICS II., CZ has opted for one of the most modern one – metastable

polymorphic carbon coating, commonly known as DLC, that is Diamond Like Coating. This type of treatment coats the surface with a layer of metastable polymorphous carbon. The result is a very hard surface with improved friction qualities and high aesthetic level. The advantage of DLC is that there is a choice of lustre or matt finishes. Therefore, the new CZ 550 SAFARI CLASSICS II. allows customers a unique choice – they can either opt for the traditional high lustre (in the days of traditional bluing is used to guarantee a high quality of the surface treatment) or for a modern, elegant velvet matt black finish. But a barrelled action is just a start. Linking the steel of the weapon and the flesh of the hunter is wood. The perfect link for a classic rifle is walnut. For the CZ 550 SAFARI CLASSICS II., only premium walnut is used, providing both strength and elegance. And for an African bolt action, a touch of ebony is a must. The contact between the wood of the stock and the barrelled action made of steel is glass bedded. This provides stable zeroing and a reliable transfer for every joule of energy released by a shot without having an adverse effect on the wood. And there are quite a few joules. Therefore, there is also a kick stop in the stock to dampen the recoil. This is not because the hunter might not manage the recoil of a tropical calibre, after all a modern hunter must be fit. Dampening the recoil enables faster repeating of a shot and that fraction of a second can make the difference between a 3D hunter and a 2D one (or as said in the old days: the difference between

a memory and an everlasting memory). The elegance and handling of the gun are enhanced by a precise diamond cut checkering on the stock. Being softer than steel, the wood also needs protection. Again here you have a choice. Either you can have a matt oil surface (which is easy to maintain, does not slip and the surface is slightly absorbent) or you can opt for high lustre shellac. The shellac is a natural, hard and waterproof high lustre finish, needing a skilled worker. In contrast to most modern surfaces of similar appearance, a skilled craftsman can repair even very substantial scratches and pitting. No matter what you do, they are inevitable on an African hunt. Although the CZ 550 SAFARI CLASSICS II. rifles have grooves for the installation of a riflescope, they are primarily equipped with mechanical sights with three wide angle opened blades. You will be glad to have them when you hunt really dangerous game. These sights enable shooting with both eyes opened without losing peripheral vision, at a moving target, from close quarters or at a large distance. Open sights are robust, there is no glass to break or to attract dirt and dust. And they don't stamp your eyebrows. Africa is a place of fascinating extremes. It is both heaven and hell, a heart of darkness that still beats just like it did in the days of the great white hunters.

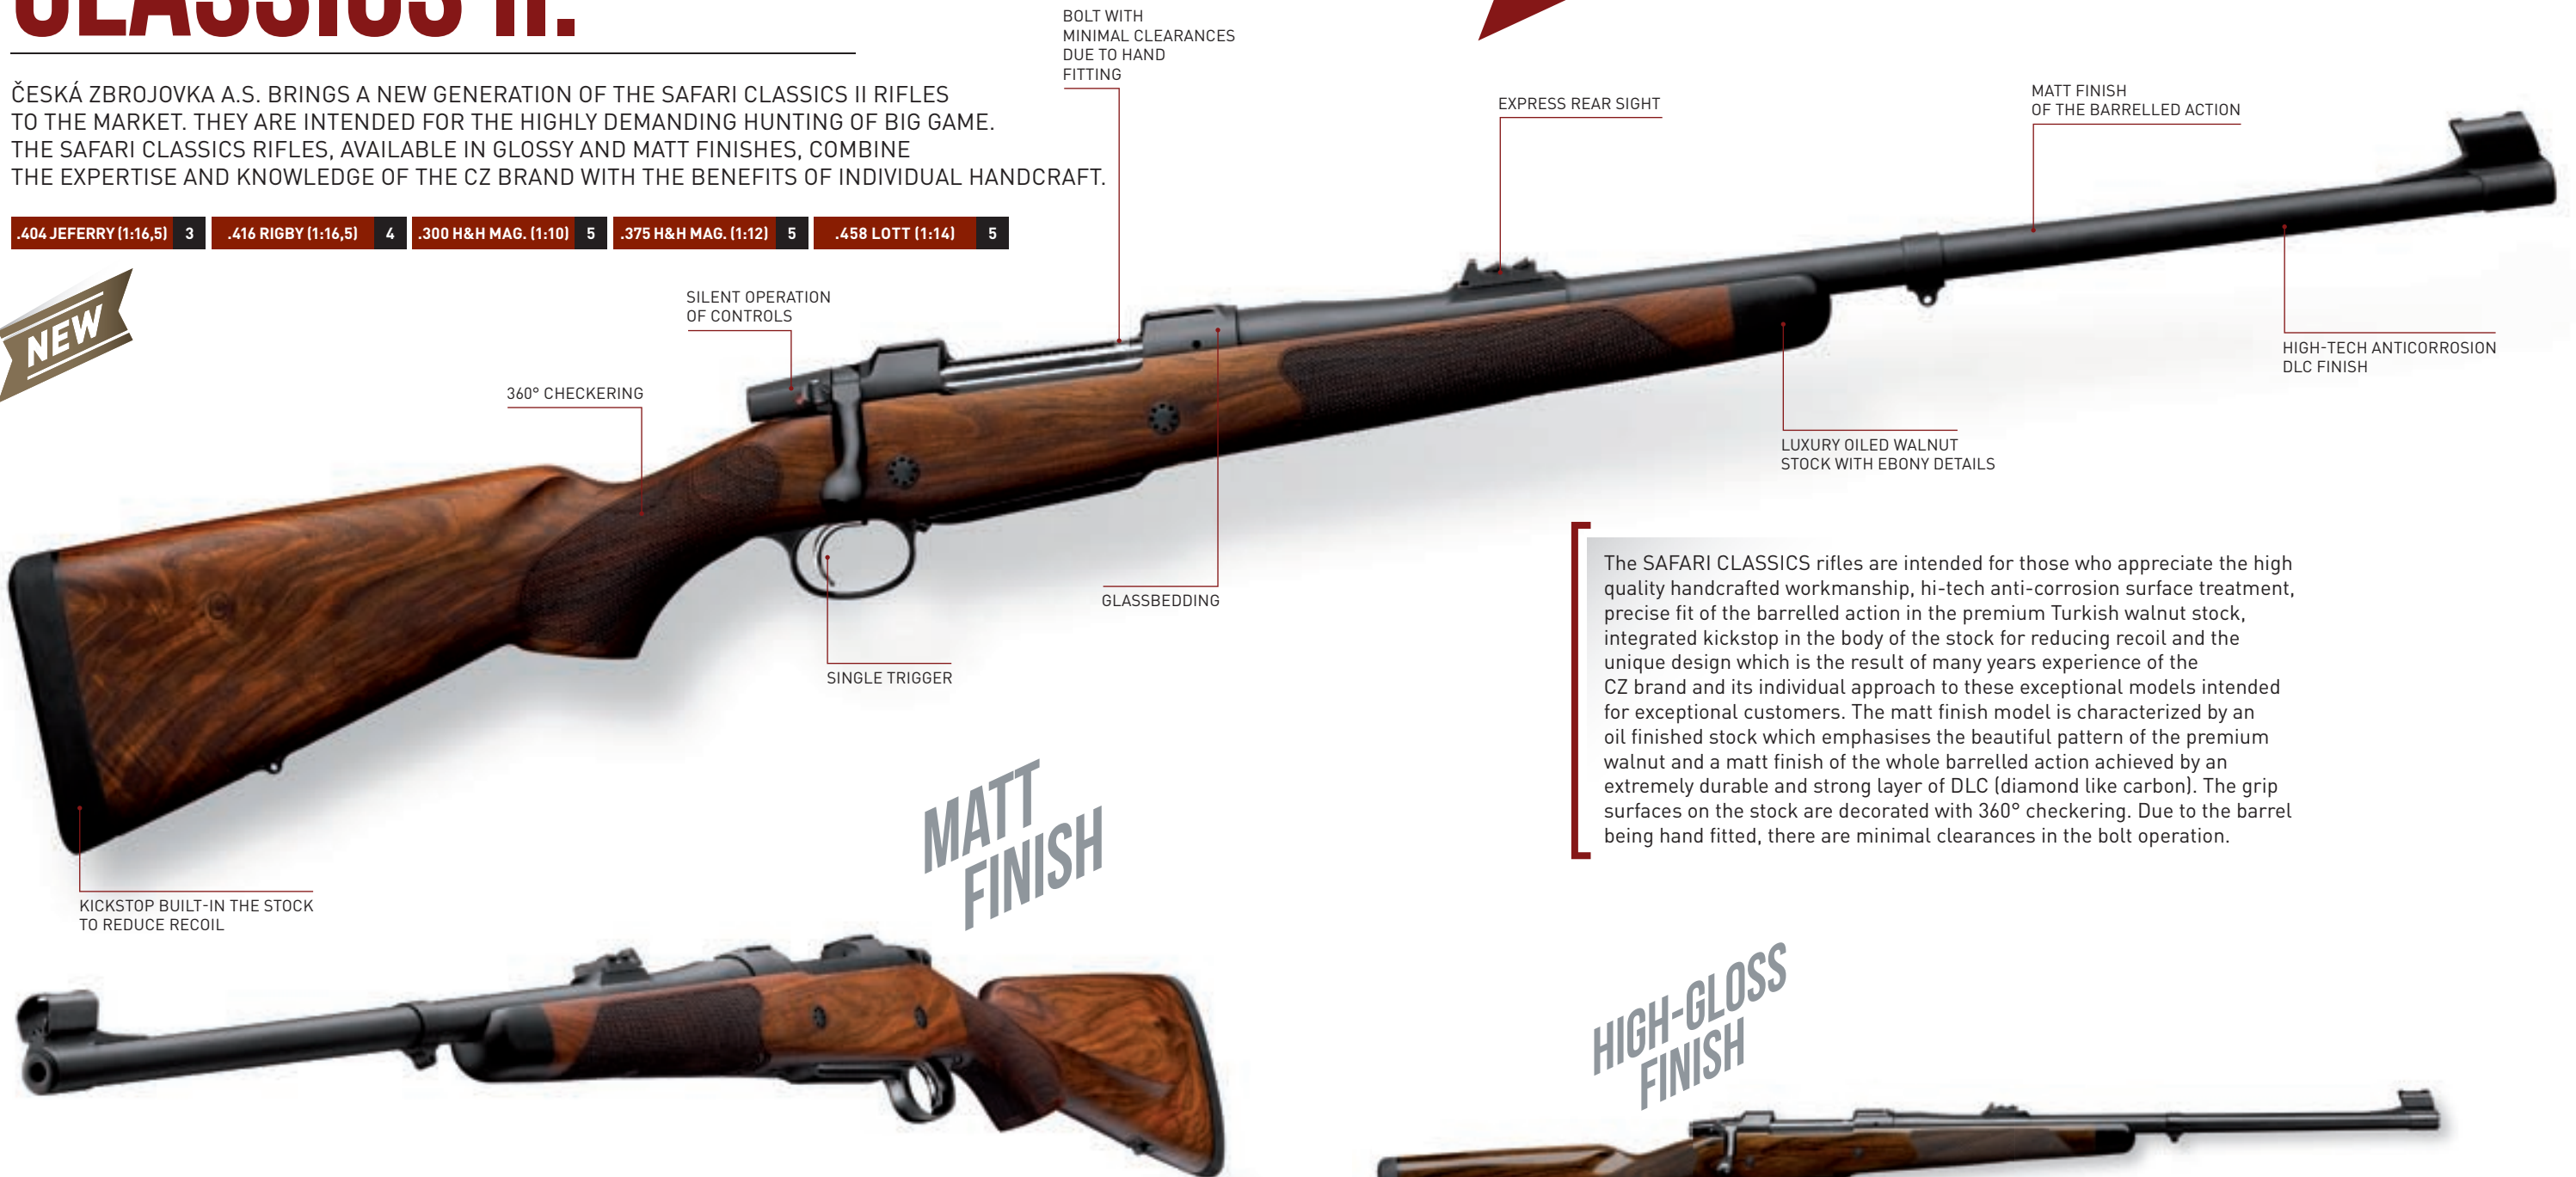

Hunting in Africa is a powerful experience even if you do not encounter any really dangerous situations. The CZ 550 SAFARI CLASSICS II. rifles are designed and made so that you can fully concentrate on the hunt itself. It follows the tried and tested tradition and we have not taken a single pointless shortcut in its making. Simply to make sure that when the moment comes, you can rely on things being as you want them to be. So that your experience would be pleasant and that the quality of your gun would enhance this pleasure. And once you return home, maybe after many years and many safaris, the CZ 550 SAFARI CLASSICS II. rifle will become a grand part of your trophy collection. It is not hard to imagine that if the famous white hunters who made Africa and the African hunts a legend would come to your place for a visit, they would without a doubt notice your trusted rifle and look at it with fondness and affection. Because your CZ 550 SAFARI CLASSICS II. is a jewel of a weapon without which your trophies would not be hanging above your fireplace.

CZ 550 SAFARI CLASSICS II.

ČESKÁ ZBROJOVKA A.S. BRINGS A NEW GENERATION OF THE SAFARI CLASSICS II RIFLES TO THE MARKET. THEY ARE INTENDED FOR THE HIGHLY DEMANDING HUNTING OF BIG GAME. BEAUTY WITH PERFECTION

SAFARI CLASSICS.

The SAFARI CLASSICS rifles are intended for those who appreciate the high quality handcrafted workmanship, hi-tech anti-corrosion surface treatment, precise fit of the barrelled action in the premium Turkish walnut stock, integrated kickstop in the body of the stock for reducing recoil and the unique design which is the result of many years experience of the CZ brand and its individual approach to these exceptional models intended for exceptional customers. The matt finish model is characterized by an oil finished stock which emphasises the beautiful pattern of the premium walnut and a matt finish of the whole barrelled action achieved by an extremely durable and strong layer of DLC (diamond like carbon). The grip surfaces on the stock are decorated with 360° checkering. Due to the barrel being hand fitted, there are minimal clearances in the bolt operation.

MATT FINISH

HIGH-GLOSS FINISH

CZ 550 SAFARI CLASSICS II.

The high-gloss finish of the SAFARI CLASSICS models is intended for customers who want to emphasize the exclusivity of their rifles. The surface is protected by anti-corrosion DLC coating, the premium walnut stock with ebony details is varnished.

CZ 557 VARMINT

THE CZ 557 VARMINT IS A WEAPON INTENDED FOR TARGET SHOOTING AS WELL AS FOR HUNTING. THE SPECIFIC STOCK MADE OF PREMIUM WALNUT IS DESIGNED TO SERVE BOTH OPTIONS.

.308 WIN. (1:10) 10 **.243 WIN. (1:10) 10** (MAGAZINE)

RAISED COMB TO ALLOW CORRECT POSITIONING OF THE CHEEK FOR SIGHT ALIGNMENT WHEN USING A RIFLESCOPE

ANATOMICALLY SHAPED PISTOL GRIP

LOWERED WEAVER RAIL FITTED TO THE RECEIVER INTERCHANGEABLE WITH A 25 MOA RAIL

A BALL END SCREWED ON THE BOLT HANDLE WITH M6 THREAD, OPTION TO HAVE A DIFFERENT SHAPE

REMOVABLE METAL 10-ROUND MAGAZINE FOR CARTRIDGES UP TO 73 MM

ADJUSTABLE TRIGGER MECHANISM, OPTION TO ADJUST THE TRIGGER TRAVEL AND PULL WEIGHT (10-22 N)

INCLINED STOCK TO ALLOW HEIGHT ADJUSTMENT ON REAR BAG

1" RUBBER BUTTPLATE TO REDUCE RECOIL

The CZ 557 VARMINT model maximises the exceptional accuracy potential of the new generation of CZ rifles in the medium category. By combining the sophisticated design, excellent ergonomics, elements of target specials, cutting-edge materials and the latest production technologies, a truly unique weapon was born. It meets the requirements of even the most demanding users from the ranks of advanced sport shooters and hunters. The basic design in the tried and tested .308 Win. calibre is joined by a model using the popular and accurate .243 Win. calibre, suitable especially for more experienced hunters. Besides the basic 10-round magazine, a shorter 4-round magazine may be used.

10-ROUND MAGAZINE

TWO STAGE TRIGGER, FULLY ADJUSTABLE TRIGGER MECHANISM

The sight system formed by the adjustable mechanical sights and a weaver rail on the receiver allow for a quick response of the shooter. The groove in the middle of the weaver rail enables aiming through the mechanical sights. When the weaver rail is removed, there is a standard dovetail with an interface [19 mm]. The two stage trigger mechanism is factory-set. However, it is fully adjustable, it can be therefore adjusted in accordance with the user's needs, even as a single stage trigger.

HARD WORKER

CZ 557 LUX

This upmarket version of the CZ 557 model has a high quality walnut stock fitted with a bavarian style cheekpiece and a more robust pistol grip.

This model is also available in a magazine version for the .308 Win. and .243 Win calibres. The standard magazine supplied is the 4-round version, a 10-round magazine is available as an optional accessory.

ALL METAL 5-ROUND
MAGAZINE

What happens when you fit the more and more popular THUMBHOLE style stock to a CZ 527 "small mauser"? An original, beautiful and compact yet highly accurate hunting rifle is created. The modern style of fitting with increased emphasis on the best ergonomics together with the attractive look suit this CZ 527 light rifle very well. What is more, it has a favourable effect on the shooting results, aided also by the single set trigger and the heavy, hammer forged VARMINT style barrel, designed for shooting at medium and longer distances, hence the absence of mechanical sights. For easy mounting of the riflescope, there are standardised grooves on the receiver bridges.

CZ 527 EXCLUSIVE EBONY EDITION

REAL TASTE OF LUXURY

AN ELEGANT MODEL WITH ERGONOMIC WALNUT STOCK AND EBONY DETAILS, GLOSSY BLUED BARLEY TWIST BARREL AND A JEWELLED BOLT.

.223 REM. (1:9) 3 .222 REM. (1:14) 5

The CZ 527 "small mauser" is a beautiful, perfectly balanced weapon which suits both traditional and modern style stocks. However, Česká zbrojovka a.s. also thinks of customers who desire something truly luxurious. As a result, the CZ 527 EXCLUSIVE EBONY EDITION was born. The sophisticated elegance of this light rifle is emphasised by the barley twist barrel, walnut stock of the very best quality, ebony details on the tip of the forend and pistol grip, and a decorative circle finish on the bolt. This weapon embodies a unique piece of a firearm jewel, which in spite of its decorative elements maintains absolute functional reliability and high accuracy.

CZ 527 CARBINE

CZ 527 LUX LH

A VERSION OF THE CZ 527 LUX, DESIGNED AND PRODUCED FULLY CONFIGURED FOR LEFT-HANDED USERS.

.223 REM. (1:9) 5

OPTIMIZED FOR SUCCESS

Simply put, the CZ 527 LUX LH is a mirrored version of one of the basic variants of this successful series. The aim was to provide all the comfort of the right hand version to shooters with a dominant left hand. Therefore the bolt handle, all the other controls and the extractor are fitted on the left side. Another left-hand rifle from this series is the 527 AMERICAN LH without cheekpiece and mechanical sights.

CZ 527 LUX

This elegant model in a classic European style has a traditional style stock made of premium Turkish walnut with cheekpiece and open mechanical sights.

RIMFIRE RIFLES

CZ RIMFIRE RIFLES – A TRADITION SPANNING OVER ALMOST HALF A CENTURY, A LONG EXCEEDED MILLION MODELS SOLD ALL OVER THE WORLD, AND CONTINUOUS GLOBAL POPULARITY.

Rimfire rifles made by Česká zbrojovka have become famous on all continents. Their production in Uherský Brod began in 1964 and since then these weapons have been continuously modernized and adapted to current trends and customer requirements. In all markets, the discontinued CZ 452 family has been replaced by the CZ 455 modular rimfire rifles. Because of their simplicity and adaptability, they currently represent the best-selling model series of Česká zbrojovka on the civilian market. The traditional bolt action version has been joined by the CZ 512 semi-automatic series, which currently includes several attractive models and is gaining more and more fans around the world.

CZ 455 STAINLESS

“THERE IS NO SHAME IN NOT KNOWING” THE OLD SAYING GOES AND SHOOTING SKILLS ARE NO EXCEPTION. MOST OF US GOT THE FIRST TASTE FOR SHOOTING WITH AN AIR PISTOL OR RIFLE AT A YOUNG AGE. BUT THESE ARE JUST PELLETS. THE FIRST “TRUE RIFLE” FOR A SHOOTER IS USUALLY A SMALL BORE RIFLE.

Experienced shooters often say that if you cannot cope with a small bore, you most likely cannot shoot at all. What you cannot really learn is how to manage the recoil. But otherwise, there is no shooting lesson which could not be learned with a small bore rifle. Do you need to master the basics – how to handle your gun safely, how to load, unload, aim and work the trigger? All these skills can be learned with a small bore. Do you want to learn more serious skills, such as how to compensate for distance, zero your gun or how to shoot from non-standard positions? Your small bore is here and ready to help. Are you struggling with even more specialized skills, for example how to shoot at moving targets, compensate for wind or shoot instinctively? Even these skills can be mastered with a small bore.

A small bore rifle is an excellent teacher, it requires precision, it shows you everything. With a small bore in your shoulder you cannot hide any deficiency but for the noise or recoil. You can have it with open sights, dioptré sights, a riflescope or a collimator sight. It can be accurate to the limits and show every smallest mistake you make. If you have doubts about your shooting skills or if you want to improve your shooting skills, you would be hard pushed to find a fairer and stricter referee and teacher. However, it is just one aspect of what a small bore can do for you. A small bore is also a top quality weapon offering shooting at a reasonable cost. It doesn't matter if you want to simply maintain your shooting skills or enjoy shooting for fun, with a small bore rifle shooting as cheap as it gets. Another advantage: the best pleasures in

life are shared, shared with your closest. The small bore rifle can be handled by anyone; boys and girls, teenagers, young ladies and gentlemen, burly men as well as smaller women or even by old pensioners, including the granny next door. All you need is one single small bore rifle and a target that pleases the eye with its dramatic reaction when hit, for example, an empty coke can or a sack of potatoes. Later, you will remember the times spent on a shooting range and they will become an inseparable part of your family memories. But that is not all. You can also hunt with a small bore. You can hunt small trophy game and you can hunt varmint. In the wilderness the small bore becomes a handsome “camp rifle” which provides a welcome improvement to your diet. And if things go really wrong and you

struggle for mere survival, the low weight of this small rifle and ammunition will be welcome benefits while still enabling you to effectively hunt animals up to 40 pounds of weight.

By all means, the small bore rifle is neither the king nor the queen of the shooting world. But it is definitely a much loved princess without which the shooting kingdom would be a very sad place. And not only loved, this princess is a right little hardworking madam as well.

NO COMPROMISES

Like every true princess, the CZ 455 small bore rifle comes from a good family. The ancestors of the CZ rimfire rifles can be traced back to the years shortly the end of WW2 and over the years, they have achieved almost total perfection. However, in contrast to many princesses, the CZ 455 is no frail or spoiled little thing. Her bolt is locked and works exactly like a bolt of any bolt action hunting rifle should. She is made in a traditional way with a full metal design and there are no compromises or “economic shortcuts” during production. Every principal part of the rifle is made from solid steel. As a result, she is really tough, accurate and so durable that it will serve

not only you but also your children and maybe your grandchildren too.

The trigger of the CZ 455 is adjustable in terms of weight and pull, the sights are adjustable as well and the receiver is dovetailed for the attachment of a riflescope. Should you have more sporting ambitions, CZ offers a special sport trigger mechanism kit as well. The muzzle is threaded for the easy attachment of a silencer (where permitted or even required by law).

The CZ 455 has a box magazine similar to the magazine of a repeating hunting rifle, which aids the development of shooting habits needed for a “big rifle”.

A FRIEND IN NEED

Any model of the CZ 455 small bore is ready to fulfil all the requirements and tasks described above. No doubt this means a lot of work and a very demanding service. CZ therefore offers a version with all the main parts made from stainless steel. The parts which are made from corrosive materials are treated with ARCOR surface oxidation treatment. This is a unique carbon-nitride oxidation treatment that improves surface hardness, friction properties and resistance

to corrosion. All this is embedded in a plastic stock, impervious to water and rapid temperature changes, which makes the CZ 455 STAINLESS a hardworking and tough weapon. She will tolerate the harsh conditions of outdoor use, she is resistant to adverse weather conditions and she is not too bothered if you sometimes lapse and not clean and maintain her regularly (in necessary cases and when there is a serious reason, of course. Let him who is without sin cast the first stone...). Being a true princess, the CZ 455 STAINLESS also bothers about appearance. The combination of white stainless steel parts and the black ARCOR treated parts is elegant and this elegance is further complemented by the colour of the plastic stock. The CZ 455 STAINLESS is a weapon that will serve and provide a lifetime of pleasure not only to you but also to your dear ones. She will serve you no matter where you are, you can take her to a dusty desert or to humid subtropical jungle or to a frozen landscape at one of the poles. It is a small and charming rifle bringing immense shooting delight and the purest joy to the shooter.

CZ 455 STAINLESS

ALL THE MAIN PARTS OF THE ANTI-CORROSION MODEL CZ 455 STAINLESS ARE MADE OF STAINLESS STEEL AND THE BOLT AND SMALL PARTS ARE TREATED WITH THE ANTI-CORROSION ARCOR FINISH. THE ATTRACTIVE BLACK/GREEN POLYMER STOCK IS FINISHED IN SOFT-TOUCH.

This variant of the successful CZ 455 rimfire rifle has a highly increased resistance against the weather, especially moisture. It has been achieved by the extensive use of stainless steel combined with the highly durable and abrasion resistant ARCOR surface treatment, based on salt bath nitriding. The stock is made of robust polymer reinforced with glass fibre. For maximum user comfort, it has a soft-touch finish. The result is an attractive weapon that is suitable for all kinds of adverse weather conditions.

CZ 455 SYNTHETIC

Thanks to the AMERICAN style polymer stock with a soft-touch finish, the CZ 455 SYNTHETIC model is lighter while the operating comfort in adverse climatic conditions remains high.

YELLOW ANODIZED TRIGGER GUARD AND MAGAZINE BASE

SPORTS FLY WEIGHT TRIGGER MECHANISM

This sports special is based on the highly accurate CZ 455 THUMBHOLE model with a fluted barrel and a characteristic, ergonomic stock with a hole for a right-hand thumb. currently, the stock made from laminated wood is available in yellow and black colour. Yellow is also used on the trigger guard and the magazine base. The key adjustment for the target shooting is presented in the new fly weight trigger mechanism with the option to set the pull from 1 to 5 N. The trigger may also be set to a two stage trigger with the option to set the trigger travel and pull weight of the first and second stage individually by the user. Another option is to disable the first trigger stage resulting in minimum reset.

JUNIOR GAME

Česká zbrojovka a.s. offers several models appealing to the youngest shooters. Regarding rimfire rifles, it is a variant of the CZ 455 SCOUT whose total dimensions (including barrel length) and overall ergonomics are suited to a child's build. For basic training there are mechanical sights but there is also an interface for the installation of a riflescope. As standard, this rimfire rifle is supplied with an adapter that is fitted in place of the magazine and allows only one cartridge to be used. The CZ 455 SCOUT model is the ideal tool for the correct learning of basic shooting habits, although it makes an equally good hunting weapon for more proficient shooters.

CZ 455 VARMINT

The CZ 455 VARMINT is the basic model of a rimfire rifle featuring a heavy barrel designed for sport shooting and hunting at longer distances. The heavy, hammer forged barrel ensures constant accuracy even when shooting a greater number of rounds.

CZ 455 JAGUAR

AN ELEGANT MODEL WITH AN EXCEPTIONAL 726 MM LONG HAMMER FORGED BARREL AND FINE DECORATIVE ELEMENTS. THE STOCK WITH A CHEEKPIECE PROVIDES HIGH SHOOTING COMFORT.

.22 LR (1:16) 10

Thanks to its 726 mm long, hammer forged barrel, the CZ 455 JAGUAR maintains perfect accuracy at surprisingly long distances. For this purpose, the rifle is equipped with a steel tangent rear sight adjustable up to 200 m. The rifle's exceptional elegance is emphasised by several original decorative elements with a jaguar motif. Above all, it is the laser etched claws on the stock in place of the usual checkering. The cheekpiece on the left side of the beechwood stock significantly contributes to the shooting comfort.

CZ 455 FS

In the spirit of European hunting traditions, this elegant hunting rifle is made with a Turkish walnut full-stock with checkering on the gripping surfaces. It comes with a 5-round magazine.

BRNO EXPRESS

“EUROPE IS AT WAR, A WAR AGAINST THE WILD BOAR. AND I AM AFRAID WE ARE LOSING THIS WAR.” A COUPLE OF YEARS AGO THESE WORDS WERE UTTERED BY THE PRESIDENT OF ONE OF THE LARGEST EUROPEAN HUNTING ASSOCIATIONS ON THE OCCASION OF THE OPENING CEREMONY AT THE IWA FAIR. THE FACT IS THAT NUMBERS OF CLOVEN-HOOFED GAME ARE AT A HISTORICAL MAXIMUM NOT JUST IN EUROPE, AND THE WILD BOAR IS PREDOMINANT. THEY ARE HIGHLY INTELLIGENT, FAST MOVING, MOSTLY NOCTURNAL ANIMALS WHICH REPRODUCE VERY QUICKLY. THE HUMAN AGRICULTURE INDUSTRY SYSTEM IS ALMOST PERFECTLY CUSTOMIZED FOR THE WILD BOAR’S TASTE, SO – FOR THE TIME BEING – THEY ARE WINNING.

One efficient way to hunt wild boar is a battue. In daylight, herds of wild boar are forced by beaters to move and a human, even with his inferior senses, then has a chance to hit the boar effectively. Hunting in a situation when a large number of potential targets suddenly appear in front of the hunter requires a steady hand that is capable of quickly selecting the right target from a choice of many and a weapon capable of lightning fast shots when needed. Hunting heavy African game has resulted in the development of a specific weapon – a double barrel rifle. While the African tradition settled on a side-by-side arrangement of barrels, the European ideal is an over and under rifle, commonly called the Express.

So what are the advantages of this weapon? The design with the over and under arrangement is considered better and more helpful for precision shooting.

The design with the barrels positioned side by side is advantageous especially when a fast, instinctive shot is required – i.e. when stopping dangerous charging African game. But such game (with the exception of bears) doesn't exist in Europe. On the other hand, the over and under Express has to be capable of accurate shots at medium and long distances, for instance from a tree stand.

Two independent locks connected by means of one trigger mechanism guarantee high reliability of the Express rifle. But the key advantage lies elsewhere – it is the possibility to immediately repeat the shot. The time span between the two shots is not dependent on any of the gun mechanisms; it depends only on the will of the shooter and on the speed of his finger on the trigger. The tilting barrels then allow for a shorter design and easier loading.

THE EXPRESS FROM BRNO

For quite a long time, Zbrojovka Brno, now a subsidiary of CZ, has been the producer of an excellent over and under rifle – the BRNO COMBO. In contrast to a majority of other weapons of this type, the BRNO COMBO is not a redesign of some already existing over and under shotgun but it was designed completely from scratch. Since the very first drawings, it was decided that the gun would have only one shotgun barrel, not two. Therefore, the BRNO COMBO has a compact, ergonomically shaped receiver. Thus the idea of designing an Express took shape. To utilize the weapon's potential to the maximum extent, it was necessary to redesign the trigger to a single trigger and the BRNO EXPRESS model was born. The over and under BRNO EXPRESS rifle uses the proven technology of a thermostable barrel block, which regarding function is similar to the free

floating barrel of a repeating rifle. The barrels are held in the rear block but they are not soldered together. At the front, the barrel muzzles are connected only by a guiding clamp. Because of this, once a barrel is heated during firing, it can extend freely. Even when many shots are repeatedly fired from the barrel quickly which means the barrels are heated asymmetrically, the mean point of impact, i.e. zero, doesn't change and neither does the intersection of the axes of fire. Another welcome feature is the possibility of a simple adjustment of the barrel regulation. In traditional soldered barrel blocks this means a laborious and complicated affair. The barrel block has to be unsoldered, the intersection has to be adjusted and the block has to be carefully soldered together again. In the BRNO EXPRESS the adjustment is achieved by adjustment screws on the block. Does the shooter want the intersection of the axes of fire at 50 meters? He can have it. Should he prefer the intersection at 150 or 200 metres, it is entirely up to him. Should he change the ammunition, especially in terms of the bullet weight, and the intersection has shifted, a gunsmith can easily remedy it during a single visit to the shooting range. The rugged look of the gun is achieved by using high grade steel as the principal material. The reliability is positively influenced by the simplicity of the design. The under and over BRNO EXPRESS rifle is locked by a single locking wedge operated

by a top lever. When locked, the barrel block rests on two short studs which act as a hinge as in the traditional design and on the canted surface of the receiver sides. The striking mechanism is cocked by tilting down the barrels, the barrels have the extractors. The result is a lightweight but durable weapon.

If the Express is to be the best at what it does, then the sights need to provide fast, intuitive aiming even in poor light and at a moving target. Therefore right from the box, the over and under BRNO EXPRESS is equipped with a fibre optic front sight so that the shooter's eye does not need to search for the aiming point. To utilize its great accuracy, the BRNO EXPRESS model is equipped with a rail for the installation of a sighting device. It is up to the shooter and the character of the respective hunt whether he chooses a red dot sight or a riflescope. The rail can either be a traditional dovetail as used on the hunting rifles (compatible with the BRNO COMBO shotgun rifle) or the more and more popular MIL STD 1913 – the Picatinny rail. The BRNO EXPRESS is produced in European calibres designed for break-action weapons, calibres that have already proved their reliable function in break-action shotguns as well as their effectiveness on large European game. As in the case of the design, Zbrojovka Brno and thus also CZ which sells the weapons of its Brno "daughter" and is partly involved

in the manufacture rely on proven solutions. Europe is waging a war against the wild boar. Over and under rifles are just one example of a number of highly efficient weapons designed for wild boar hunting and what is more, they are not likely to be influenced by potential future legal limitations. The Express has always been a bit of a cult weapon. Either you have it and are a member of the "the band of brothers" or you don't, and then we are sorry, but it is bad luck for you. That is just how it is. In the past, wider use of the Express rifles was rather difficult, largely due to high cost – a result of the complexity of making the barrel block, and also because of the reluctance to use it due to unclear regulations regarding the changing of the ammunition. Not one of these objections applies to the under and over BRNO EXPRESS. It may be that in your hunting grounds there are not that many wild boar to make it a strong enough reason to have the Express. But it is not an exclusive tool for a battue. The BRNO EXPRESS is a very accurate, essentially a general purpose hunting rifle for the effective hunting of any hoofed game in any grounds. It is a weapon that enables you to present your shooting skills to the full. The BRNO EXPRESS has arrived and it is waiting just for you. Welcome aboard.

BRNO EXPRESS

THIS NEW DOUBLE RIFLE FROM ZBROJOVKA BRNO IS BASED ON THE SUCCESSFUL BRNO COMBO AND HAS BEEN SPECIALLY ADAPTED FOR BATTUES.

- 8x57 JRS (1:9)
- 9,3x74 R (1:14)
- .30R BLASER (1:10)

LIGHTWEIGHT EXPERIENCE

The rifle retains all the properties of the combo rifle/shotgun, including low weight, thermostable barrels and outstanding accuracy. The crucial innovation is the single trigger. In order to shoot for the second time all that the shooter needs to do is to pull the trigger again, thus saving valuable time not having to feel for the second trigger. The upper barrel is equipped with a fibre optic front sight and an aperture rear sight, however, a mount for a riflescope or a weaver rail may also be installed.

BRNO COMBO

An elegant rifle/shotgun with an option to use the BRNO EXPRESS rifle barrels from the new BRNO EXPRESS.

- 12/.308 WIN. (1:12)
- 12/.30-06 SPR. (1:10)
- 12/8x57 JRS (1:9,4)
- 12/9,3x74 R (1:14,2)

NEW CALIBRE FOR 2017

- 12/.30R BLASER. (1:10)
- 12/.223 REM. (1:9)
- 12/.22 LR (1:16)

The main advantages of this popular model is the automatic safety, practical aperture rear sight, adjustable fibre optic front sight, single set trigger, low receiver and, premium Turkish walnut stock.

10709020 RAIL ADAPTER

- low weight all-steel design – only 141 g
- stable fitting on the weapon maintaining consistent accuracy
- extended rail – option to fit a collimator according to individual body type or posture of the shooter
- the rail is made by chip machining from a single piece
- aiming groove – maintaining easy view of the mechanical sights with the rail fitted
- grooves are numbered – correct positioning when reassembling accessories
- made by the same manufacturer

TURKISH WALNUT STOCK

PURE SIMPLICITY

CZ-USA

5 FLUSH INTERCHANGEABLE CHOKES

LASER ETCHED CHECKERING ON THE STOCK AND FOREND

LIGHTER RECEIVER MACHINED FROM A SINGLE PIECE

LIGHTER TRIGGER PULL

The new generation of the MALLARD G2 over/under shotgun once again offers superior parameters and performance at a very reasonable price. The weapon is suitable for hunting and sport shooting, it stands out with its simple design, quality manufacturing, user friendliness and accuracy. The pellet pattern can be adjusted with five interchangeable chokes. New advantages also include lower weight achieved by adjusting the receiver, and the smoother pull of the optional single trigger.

REDHEAD PREMIER

A universal over/under shotgun. The lightweight silver receiver is equipped with ejectors which offer high shooting comfort to both sport shooters and hunters. The safety on the top of the stock also serves as the barrel selector.

12/12

20/20

SPORTER

This over/under shotgun offers the user the same system of a single trigger as the REDHEAD PREMIER. It is fitted with a Grade 2 Monte Carlo sport stock with adjustable comb and a right-hand palm swell. The stock is decorated with laser etched checkering and the barrels are made of 30" single-piece milled steel. The weapon is supplied with 5 interchangeable chokes.

12/12

SHARP TAIL

This double barreled shotgun is equipped with an optional single trigger. Compared to its predecessor, the RINGNECK, it has hammer operated coil springs which ensures smoother trigger pull. The drop safety is enhanced by independent "floating" firing pins.

HEIGHT AND SIDE ADJUSTABLE CHEEKPIECE

16J ENERGY

MUZZLE CHOKE

PRESSURE CYLINDER FOR 50-70 ROUNDS

MOUNTING RAIL ON FOREND

ADJUSTABLE TRIGGER MECHANISM

BUTTPLATE ADJUSTABLE IN LENGTH AND HEIGHT

A new addition to the family of popular CZ 200 air guns suitable for sport, hobby shooting, hunting and practice. Its single piece green stock made of beech with a "Diabolo" style checkering design on the grip immediately attracts attention. The stock of the CZ 200 S GREEN model may be partially adjusted to the physiognomy and habits of each shooter by the adjustable buttplate and cheekpiece. The weapon is supplied as standard without mechanical sights and with a standardized interface for the scope mounts. The muzzle energy in the .177 calibre is 16 J.

CZ 200 S HUNTER

The basic model of the CZ 200 S HUNTER is produced in .177 or .22 calibres and except for sport purposes, it may also be used for varmint control (subject to legislation) as its muzzle energy can be set up to 16 J. This model is fitted with a single piece stock with a cheekpiece and a pressure cylinder with the capacity increased by 30%.

.177

.22

CZ 200 S COLOR

This model in .177 calibre is characterized by a single piece stock made of laminated wood in attractive colours. A 4x32 riflescope with mount is included as a standard accessory.

.177

CZ 200 T

The target model of the CZ 200 T is made in .177 calibre and is intended for training and basic competition shooting.

SEMI-AUTOMATIC

DYNAMIC SPORT SHOOTING, SECURITY SERVICES, MAINTAINING SHOOTING FITNESS AND FUN – THESE ARE THE MOST POPULAR USES OF THE CZ SEMIAUTOMATIC SERVICE WEAPONS.

Automatic weapons from Česká zbrojovka a.s. rank among the very best in the world in its category, the same goes for their exclusively semi-automatic versions, the CZ 805 BREN S1 .223 Rem. cal. and the CZ SCORPION EVO 3 S1 9x19 and 9x21. These models are distinguished from their original service models by the absence of a fully automatic mode. They are characterized by exceptional durability, high accuracy even during rapid fire, easy handling and disassembly for maintenance, reliable function even when using special or reloaded ammunition, extensive range of basic accessories and a very favourable price and quality ratio. Thanks to these qualities, these weapons are suitable for modern shooting disciplines and for training purposes. Some models have been modified for hunting. The CZ SCORPION EVO 3 S1 model is also suitable for security forces in countries where the use of fully automatic weapons is forbidden by law. This product line makes the dreams come true for all people who are enticed by the latest service products from Česká zbrojovka Uherský Brod.

CZ SCORPION EVO 3 S1

THE LEGEND CALLED SCORPION IS BACK – AND THANKS TO THE CZ SCORPION EVO 3 S1, IT IS ALSO AVAILABLE ON THE CIVILIAN MARKET.

EASY MOUNTING OF ACCESSORIES USING MIL-STD-1913 RAILS

FOLDING AND REMOVABLE POLYMER STOCK ADJUSTABLE IN LENGTH

AMBIDEXTROUS FIRE MODE SELECTOR CONTROL

EXTERNAL BOLT RELEASE

HORIZONTALLY ADJUSTABLE PISTOL GRIP

Compared to the A1 model, the S1 version does not have the option of short burst fire and the fire mode selector/manual safety has only two positions: locked and single round fire. In all other respects, the S1 model maintains excellent ergonomic and shooting properties of its service colleague and is thus the ideal sporting weapon for modern dynamic shooting events.

Dimensions and weight may vary depending on the design and configuration.

The new generation of submachine guns made in Uherský Brod, the CZ SCORPION EVO 3 A1 in 9x19 and newly in 9x21 belongs amongst the most advanced and accomplished of its category. The superb ergonomics and shooting properties are also retained in the CZ SCORPION EVO 3 S1, which differs from the A1 version by not having the full automatic and short burst modes of fire. Through extensive use of durable polymers and its sophisticated design, it is a light, easily controlled and highly accurate weapon perfectly suitable for security forces as well as modern sport shooting events. 20-round transparent magazines are supplied as standard, 30-round magazines may be purchased additionally.

CZ 805 BREN S1

THE CZ 805 BREN S1 IS A SEMI-AUTOMATIC SPORTING RIFLE OF MODULAR DESIGN IN .223 REM. CAL. THIS RIFLE IS INTENDED NOT ONLY FOR MODERN SPORT SHOOTING EVENTS, TRAINING PURPOSES, HUNTING OR HOBBY SHOOTING, BUT ALSO FOR ALL BRANCHES OF ARMED FORCES WHICH DO NOT REQUIRE A FULLY-AUTOMATIC MODE OF FIRE.

MUZZLE THREAD FOR VARIOUS ATTACHMENTS

GAS TUBE IN THE GAS ATTACHMENT WITH AN OPTION FOR TWO-STAGE REGULATION OF THE TAPPING OF COMBUSTION GASES

REVERSIBLE OPERATING HANDLE

FOLDING MECHANICAL SIGHTS WITH THE FRONT SIGHT ADJUSTABLE FOR ELEVATION AND THE REAR SIGHT FOR WINDAGE

The CZ 805 BREN A1/A2 military assault rifle ranks among the most advanced and most durable weapons in its category. Its superb ergonomics and shooting properties are retained in the CZ BREN S1 model which differs from the original military service model, the CZ 805 BREN A1/A2 by not having the option for fully-automatic and short burst modes of fire. The weapon's design is based on tapping the combustion gases from the barrel with an option of a two-stage control of the piston mechanism. The breech mechanism is locked during discharge. As its military version, this model is characterized by outstanding accuracy and durability, it also meets the requirements for reliable operation under adverse conditions (dust, sand, mud) and withstands extreme handling. The surface treatment protects this weapon against abrasion, corrosion, salt and fresh water, moisture, aggressive substances and gases generated during discharge. The materials used for this weapon are non-flammable or have an increased resistance against fire, as well as being exceptionally resistant against impact and mechanical damage. Basic disassembly and assembly for routine maintenance can be carried out without the need of any tools. Every shooter has a goal, a mission. For this reason, the CZ 805 BREN S1 is produced in three lengths of barrel, namely 11", 14" and 16".

Dimensions and weight may vary depending on the design and configuration.

The modular design allows the rifle to be further customized to everyone's own requirements. The main advantages are the interchangeability of the magazine well for magazines of the M4 type, and the ambidextrous magazine catch. Other optional accessories include, for example, a telescopic folding stock, short cocking handle, longer swivels (for snaphook use), muzzle climb compensator, longer fire mode selector, mil -std 1913 side rails and many other accessories.

CZ 455 FLY WEIGHT TRIGGER
FLY WEIGHT 1N-5N

TRIGGER FOR THE CZ 455 SYSTEM DESIGNED FOR PRECISION SHOOTING

The trigger assembly contains:

- Trigger
- 1x Assembly pin
- 2x Allen key
- Factory setting - 3±0,5N
- Range of setting - 1-5N

Setting options:

- individual setting of trigger pull weight of the first and second trigger stage
- individual setting of trigger travel length of the first and second trigger stage
- option to remove the first trigger stage
- minimum reset

Design set of tuning parts for the CZ 455 rimfire rifle made from aviation duralumin. The set contains a trigger guard, extended magazine catch and plastic magazine base.

BALLISTIC T-SHIRT/VEST
FOR ULTRA-CONCEALED CARRY CZ 4M SPIRIT – BLACK (L)

T-shirt for concealed carry in advanced ergonomic design. The design of the vest allows for maximum concealed wear required during covert operations or for personal protection.

- The lightest ballistic vest
- Anatomical design for concealed carry
- A unique system for dressing quickly
- Made from MOIRA® functional fibre

- BALLISTIC RESISTANCE:**
- NIJ STD 0101.04 level II.A
 - NIJ STD 0101.04 level III. A
 - On request by the customer

9
0106-0240
BALLISTIC VEST
FOR CONCEALED CARRY CZ 4M VIP – NUDE (L)

A CZ 4M VIP ballistic vest for concealed carry. The design of the vest allows for maximum concealed wear. It is particularly suitable for bodyguards, VIP protection or for patrol units from police and security forces. The outer jacket material reduces adhesion of the outer clothing and is silent. The special velcro fasteners are gentle on the clothes. The flexible parts of the vest are made of neoprene which is a highly durable, permanently flexible and UV resistant material. The vest is designed so as not to create unwanted folds and to be unnoticeable in any position during concealed carry. There is a special pocket on the front of the vest for the insertion of an additional ballistic plate to protect against rifle ammunition to the IV NIJ level of resistance.

- TYPES OF BALLISTIC RESISTANCE:**
- NIJ STD 0101.04 level II.A
 - NIJ STD 0101.04 level III. A
 - ČSN 395360 TBO2
 - ČSN 395360 TBO3
 - STANAG 2920 protection V50 to 650m/s

Overall weight (size L, NIJ 01.01.04 level III.A) only 1.7 kg
Ballistic protection area (size L) 0.3 m2

STAB RESISATNCE STANDARDS:

- NIJ 01 15.01
- HOSDB KR1
- HOSDB KR2
- ČSN 395360 TON I
- ČSN 395360 TON II

Plastic service holster
the holster comes with a reduced belt loop and clip for MOLLE webbing. It is equipped with a thumb-break retainer and a retainer against snatching the handgun. These retainers can be operated individually or when necessary can be disengaged both at the same time. The holster is made of a heavy-duty polymer and has been tested for service use. It can be adjusted and thus adapt the angle of the handgun, e.g. when carried in a vest.

This universal plastic holster for CZ pistols is supplied complete with a paddle attachment and belt loop and is made from heavy-duty polymer. The holster can be adjusted to adapt the angle of the gun. The handgun is secured with a thumb break retainer which is comfortable to use intuitively without having to re-adjust the grip on the gun.
